

### Ethanol

Solvent. This is the alcohol that results from the fermentation of fruits and vegetables, and is a key ingredient in spirits such as vodka. The fragrance (see below) is dissolved in ethanol. Also known as E1510.

### 1,1-Difluoroethane

Propellant. This colourless gas can be fatal if inhaled. Also known as HFC-152a, this ingredient is also the main component of air dusters (which are just cans of propellant).

### Polyaminopropyl biguanide

Disinfectant/preservative also known as PABP. Used for disinfection on skin, and also as a disinfectant in contact lens cleaning solutions.

### Fragrance Secret.
